PROFESSIONAL SUMMARY

Computer Engineering student who builds backend applications with C# and .NET. I design and build REST APIs with ASP.NET Core, including a full-stack app with a React client. I have practiced clean code, CRUD operations, and database work, and I also have a Summer GTU Internship in full-stack development. Seeking a .NET Developer, Backend Developer, or Software Development Intern role.

TECHNICAL SKILLS

Programming Languages: C#, Java, C, SQL, JavaScript
.NET & Backend: .NET, ASP.NET Core Web API, REST APIs, CRUD Operations, Entity Framework Core, LINQ
Database: SQL Server, MySQL, MongoDB
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Tools & Platforms: Visual Studio, VS Code, Git, GitHub, Postman
Core Concepts: Object-Oriented Programming, Dependency Injection, Layered Architecture, API Testing

PROJECTS

JobTrack – Full-Stack Job Application Tracker
Tech Stack: *C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, React.js*

- Built a full-stack app to track job applications, with an ASP.NET Core Web API backend and a separate React client.
- Created REST API endpoints for full CRUD operations and stored the data in a database with Entity Framework Core.
- Connected the React client to the API and tested the endpoints with Swagger and Postman.

GitHub

Library Management API
Tech Stack: *C#, ASP.NET Core Web API, Entity Framework Core, SQL Server*

- Built a REST API to manage library data with full CRUD operations.
- Used Entity Framework Core to connect the API to a database.
- Tested all endpoints with Swagger and Postman.
- Tracked the project with Git and GitHub.

GitHub

Second API (ASP.NET Core Web API)
Tech Stack: *C#, ASP.NET Core Web API*

- Built a second Web API to practice controllers, routing, and request and response handling.
- Used what I learned from my first API to write cleaner and better organized code.
- Practiced C# and OOP with daily programs in the same repository (35+ commits).

GitHub

Rewind AI
Tech Stack: *React.js, Node.js, Express.js, Vite, OpenRouter API*

- Built a full-stack AI web app using Groq and Gemini models through the OpenRouter API.
- Built secure frontend and backend communication with REST APIs and environment variables.
- Deployed on Vercel and fixed CORS and API integration problems.

GitHub • Live Demo

INTERNSHIP EXPERIENCE

Full Stack Development Intern | *Shrinav (Remote)* July 2026

- Delivered 6+ working applications in a 2-week Summer GTU Internship, each with CRUD functionality.
- Built REST APIs with Node.js, Express.js, and MongoDB across 3+ full-stack projects.
- Used Git for version control and fixed merge and debugging issues without losing project progress.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering
Government Engineering College, Gandhinagar | Expected Graduation: 2027 | CGPA: 7.49 / 10

CERTIFICATION

Summer GTU Internship – Full Stack Development, Shrinav (July 2026)

LANGUAGES

English, Hindi, Gujarati
